

WEB TIME CARD SYSTEM

| apex time solutions |

ATS Web Time Card/PC Punch is completely web-enabled and utilizes state of the art technology. It is a companion product of our Time and Attendance Software.

ATS makes it possible for employees to submit time and attendance with the convenience of an Intranet or Internet web page. No need to send in timesheets - perfect for small or large sized companies.

- Access system through Netscape or Internet Explorer browsers
- Enables employees to view their time card history, total hours worked and accrual benefits. "Optional" public and private messaging not only enables supervisors to send messages to employees, but also messages from one employee to another.
- Utilizes server's time to avoid any misrepresentation of punches
- Handles multiple time zones efficiently
- Designed to operate under Windows NT/2000/Server 2003/2005 or higher, Windows XP and Linux network environments.
- Reduces supervisor time spent with timekeeping and scheduling
- Eliminates time cards, their preparation, and collection distribution costs
- Web-based electronic timesheets via company Intranet or Internet

FEATURES

- Access via all popular browsers including Netscape and Internet Explorer
- Enables management staff to view time card details, total hours worked and exceptions such as tardy arrivals and missing punches
- Employees may be sorted by their Employee ID or Last Name.
- Filtering allows only a certain range of employee numbers or names, and date ranges can be specified to limit the amount of data displayed.
- An Employee List displays the Hire Date, Job Date, and Seniority Date for each active employee.
- Allows the most up-to-date reports as data is drawn directly from the ATS Software
- Designed to operate under Windows NT, Windows 2000/XP and Linux network environments

ATS Web Reports is completely web-enabled and utilizes state of the art technology. It is a companion product to our Time & Attendance Software.

Web Reports makes it easy for managers to perform reports on employee time and attendance information through the convenience of an Intranet or Internet web page.
